Another Collaborative PhD Program in Electrical and Computer Engineering with CSU (Posted on 02-13-2004)

This month a new MOU for another Collaborative PhD Program in Electrical and Computer Engineering was signed with Colorado State University. The agreement is similar to the one recently started with UMass in which students, accepted at both universities, spend the first year at CSU, then return to UPRM to complete their research work needed for the doctoral degree. The students can take courses from either institution but the diploma is conferred from CSU. This MOU provides the students the opportunity to collaborate with researchers from prestigious institutions and at the same time allows long-terms research be performed at UPRM facilities.

In the picture, Deans and Professors for CSU and UPRM and the chancellor sign the MOU, including Dr. Jorge Velez Arocho, Dr. Omnia El-Hakin, Dr. Sandra Cruz-Pol, Dr. Tony Maciejewski, Dr. Jorge Ortiz, Patricia Banuelos and Dr. V. Bringi.
